THE ARCHITECTURE GRAND IDENTITY

True luxury is found in spaces that are open,
uncluttered and in tune with nature.

From the flowing facades to the
tranquil courtyards, every design element
reflects symmetry, naturalness
and mindfulness. The towers rise with
quiet dignity, their elegance understated,
their presence profoundly serene.

The architecture embraces clean
geometry, sleek lines and layered balcony
profiles, offering a calm yet striking identity.

Surrounded by landscaped greens and
year-round beauty, the environment
encourages active engagement
and moments of peace.

3 TOWERS

The design of these towers draws inspiration
from the meticulous craft and artistry of Japan
blending elegance with precision

The sharpness of their form commands
attention with clean geometric lines that reflect
a sense of craftsmanship in every detail

The towers stand as a testament to sharpness and
precision embodying the essence of Japanese design
in every facet

GRAND LOBBY

DROP OFF AREA

ZEN RESIDENCES

Amid the rhythm and rush of life,
find a sanctuary of stillness.
Inspired by the timeless principles of Zen,
the three sculpted towers, each 30 floors high,
are conceived not merely as homes,
but as meditative spaces.

LANDSCAPE

INSPIRED BY THE PRINCIPLE OF "MA"

The Principle of "Ma" is a fundamental concept in Japanese culture, deeply rooted in the understanding of space, time and relationships.

"Ma" refers to the interval, pause or negative space between elements. It is the art of creating balance through emptiness and the recognition that space is as important as the objects or elements it surrounds.

"Ma" is not about absence but about the presence of space that invites contemplation, harmony and flow.

In our landscape design, elements like water
gardens, meditation pools and landscaped
paths thoughtfully embody
the principle of "wa".

The water gardens invite stillness
through calming ripples, while the
meditation pools create moments
of pause and reflection.

The landscaped paths guide you through
a journey of balance, where the
spaces between various elements
create contemplation
and harmony, allowing the beauty of
absence to enhance the experience.

MICROCLIMATIC LANDSCAPE DESIGN

The landscape is thoughtfully designed to create cooler, comfortable outdoor environments through microclimatic zones that differ from the surrounding climate. By integrating wind movement, diverse canopy placement, water features and layered spatial design, the landscape forms a series of shaded, inviting pockets that enhance human comfort while supporting biodiversity.

At the ground level, large canopy trees filter pollutants, provide shade and create a calm arrival experience, complemented by water features that cool the air and enrich the sounds. At the posture level, layered planting, hedges and green screens offer privacy, reduce heat and wind and create diverse activity zones. Water bodies, pools and shaded gardens further contribute to natural cooling and relaxation.

Light-colored pathways and Japanese-inspired elements such as "rain chains" add elegance and purpose, allowing sun, air and greenery to work together in harmony. The result is a serene healing landscape where nature, architecture and everyday living flow seamlessly. Creating a distinctive microclimate that elevates the overall experience.

ZEN LIVING NATURALLY

At Saxon, our design is efficient
and in harmony with its self

A POOL INSPIRED BY JAPANESE ZEN

The pool is designed as a tranquil retreat, inspired by the serene composition of a Japanese garden. At its heart stands an abstract sculptural centerpiece influenced by Japanese simplicity.

The design gently transitions into a Zen-inspired landscape, with trees planted in minimalist forms that reflect discipline and precision. Seasonal planting inspired by cherry blossoms introduces softness and romance, while carefully pruned shrubs echo the Japanese art of *Wazuki*, creating a calm, contemplative atmosphere where structure and nature co-exist in perfect balance.

INTERIORS LUXURIOUS & MINDFUL

These residences are more
than just layouts.
They are journeys of living.

Expansive windows invite natural
light to fill every corner, turning
the day into an ever-changing
artwork, bringing a sense of calm
and inspiration to daily life.

Luxurious finishes
blur the line between indoors
and outdoors, allowing
residents to feel
intimately connected with the
rhythms of the seasons, the gentle
sway of nature and the quiet
moments that make a house
truly a home.

SOCIAL HUB

At the heart lies The Social Hub,
a space where modern lifestyle
meets mindful living. Every facility
from the banquet and theatre
to the gym, spa, squash and
judo studio, to the bowling
alley, library and co-working space
is thoughtfully designed to
create moments of
peace, connection and joy

EXPERION BACKS SUTD'S RESEARCH ON SUSTAINABLE & HEALTHY LIVING

SINGAPORE UNIVERSITY OF
TECHNOLOGY AND DESIGN

Experion is funding the Net Zero Future Lab at the Singapore University of Technology and Design (SUTD) Sustainability Centre, to study advanced facades, smart design and sustainable materials to enhance residential health and sustainability. Amid climate challenges, this research aims to provide key insights for cost-effective, eco-friendly urban living. Combining literature review with advanced case study analysis, it aims to shape the future of healthy, sustainable design. The research is targeted to conclude in 2026.
