Premium Retail Stores

Step into an iconic retail boulevard designed to attract unmatched visibility & assured footfalls. With expansive frontages and strategic placement, these retail spaces attract continuous footfall, drive commercial growth, and ensure exceptional returns.

Multiplex Cinema

Anchoring the development is a grand multiplex arena. By orchestrating ceaseless activity and social gravitas, the multiplex augments the value, visibility, and vitality.

F&B Spaces

Fine dining options creating a dynamic culinary hub. Strategically curated to cultivate dynamic patronage and redefine the epicurean experience.

Studio Apartments

Perfectly designed for modern professionals and forward-thinking investors. These residences are both habitable sanctuaries and lucrative assets.

RESEARCH REPORT 2025 (JLL)

Net absorption jumps 54% year-on-year

India's continued strength in terms of its talent pool, costs and overall tech ecosystem is a key driver for global firms to invest into their real estate growth with India as the focal point. On a year-on-year basis, net absorption was higher across all cities in Q1 2025, barring Mumbai.

Vacancy declines to a near four-year low

With quarterly supply at 10.5 million sq. ft, headline vacancy declined to its lowest in nearly four years to 15.7%, down by 50 bps quarter-on-quarter. Vacancy in key office clusters remains in tight single digits.

*Gross leasing refers to all lease transactions recorded during the period, including confirmed precommitments, but does not include term renewals. Deals in the discussion stage are not included

**Net absorption is calculated as the new floor space occupied less floor space vacated. Floor space that is pre-committed is not considered to be absorbed until it is physically occupied

RESEARCH REPORT 2025 (Cushman & Wakefield)

Cushman & Wakefield has launched “Noida-Runway for Growth”, a detailed market study capturing Noida’s rapid transformation into a premier economic and real estate destination.

The report highlights the multi-faceted growth story of a city contributing nearly 10% to Uttar Pradesh's Gross State Domestic Product (GSDP).

A pivotal catalyst for this growth is the upcoming Noida International Airport (NIA) alongside several other major infrastructure upgrades.

With Phase 1 nearly 95% complete and expected to commence operations by December 2025, NIA is poised to significantly enhance global connectivity and transform the economic and real estate trajectory of the city.

In terms of rentals, Noida's office market showcases broad-based growth driven by sustained demand, major infrastructure upgrades, and the city's emergence as an attractive corporate destination within Delhi-NCR.

Leasing trends reflect this demand, with annual leasing volumes rising from under 200,000 sq ft in 2020 to nearly 372,000 sq ft by September 2025. In the first nine months of 2025 alone, Noida recorded 0.37 MSF of leasing activity, including 0.16 MSF transacted in malls and 0.21 MSF across high streets, reflecting healthy occupier activity across formats.

Fashion and F&B continue to lead demand, driven by shifting consumption patterns, a growing young workforce, and the city's expanding affluent population.

Note: Arrows indicate change from previous forecast.

Source: CBRE Research, Q3 2025

A Glimpse of the Indian Economy

- India's Gross Domestic Product (GDP) expanded by 7.8% in the April-June quarter of FY2026, accelerating from the 7.4% growth recorded in the preceding quarter. The real estate sector (alongside financial and professional services) rose by 9.5% during the quarter, while the trade, hotels, and transport sectors posted strong gains of 8.6%. The manufacturing and construction sectors also expanded by 7.7% and 7.6%, respectively.
- Retail inflation, measured by the consumer price index (CPI), eased to an eight-year low of 1.61% in July 2025, down from 2.1% in June. The decline was largely driven by a favourable base effect and softer food prices. In August, however, the CPI rebounded to 2.07%, breaking a nine-month streak of consecutive declines, primarily due to a sharp rise in food inflation.
- The country's wholesale price index (WPI) slipped into deflation June 2025 at -0.13%, led by a fall in food and fuel prices. The trend deepened in July to -0.58% before rebounding to 0.52% in August, supported by higher prices of manufactured products and a moderation in food deflation.
- The Reserve Bank of India (RBI) kept the repo rate unchanged at 5.5% in October 2025, marking the second consecutive pause after delivering a cumulative 100-basis-point reduction earlier this year. Retaining its 'neutral' policy stance, the RBI signalled caution as it balances benign inflation and stable GDP growth, while noting that geopolitical factors, including U.S. tariffs, could influence future rate adjustments.
- The HSBC India Manufacturing Purchasing Managers' Index (PMI) climbed from 58.4 in June 2025 to a 16-month high of 59.1 in July, driven by strong growth in new orders and output. The momentum continued in August, with PMI touching 59.3 due to sharp increases in factory orders and production.
- India's services sector recorded exceptional growth, with the HSBC India Services PMI reaching a 15-year high of 62.9 in August 2025. The index climbed from a 10-month high of 60.4 in June to 60.5 in July. The strong trend was fuelled by a surge in new orders in domestic and international markets.
